SAP for Sports & Entertainment Solutions | SAP Customer Checkout

A Flexible POS Solution for Retail, Entertainment, and Food and Beverage Businesses

THE BEST RUN

Address the needs of complex retail environments

Today's retail, sports and entertainment, and food and beverage settings are increasingly complex. To compete in evolving markets, you need point-of-sale (POS) solutions that offer flexibility, scalability, and rich management insights. The SAP® Customer Checkout application helps you run efficient POS operations, while **supporting the changing needs of your growing business.**

Address the needs of complex retail environments

POS technology is no longer used simply to make straightforward payments. Customers now expect to be able to collect loyalty points, obtain discounts, and create personalized accounts – quickly and efficiently. At the same time, retail environments are increasingly complex, combining entertainment with merchandising and food and drink offerings as they compete to provide exceptional customer experiences.

SAP Customer Checkout helps you adapt to the demands of the fast-moving retail, entertainment, and food and beverage sectors by taking advantage of new business opportunities in an agile manner. You can scale, integrate, and extend your POS solution rapidly to meet the needs of a growing business, while centrally managing multiple POS systems to get a consolidated view of receipts, vouchers, and users. The application also provides sophisticated tools to help you manage employees effectively and maintain personalized customer communications in compliance with data privacy regulations.

Support multiple retail scenarios using a single solution

Traditionally, businesses with different types of retail operations have used different POS software for each scenario. For example, a grocery shop, a fast-food kiosk, and a fine-dining restaurant would each use a different POS solution to meet the particular needs of the setting.

However, an increasing number of retail establishments and entertainment complexes run all three types of retail operation as part of their overall offer-

ing. This can result in complexity and a lack of flexibility when it comes to setting up and maintaining POS systems.

SAP Customer Checkout simplifies POS operations by supporting all three scenarios in a single hardware-agnostic solution. At the touch of a button, you can switch between user interfaces that are optimized for retail, quick service, and table service. As a result, you simplify your IT landscape and cut costs.

Support multiple retail scenarios using a single solution

Fulfill the needs of your growing business

Stay productive with rich POS functionality

Gain in-depth insights for effective store and venue management

Benefit from point-of-sale functionality that is tailored to your needs in retail, quick service, and table service.

Fulfill the needs of your growing business

Like many retail, entertainment, and food and beverage companies, you may aim to expand your operations by opening new outlets over time. However, many POS solutions don't grow with you, forcing you to implement new software when you reach a certain size. This results in significant expense and, perhaps just as importantly, can cause major disruption to your day-to-day operations.

SAP Customer Checkout can run as a stand-alone solution, with the SAP Customer Checkout manager tool providing back-end management and analysis

capabilities. However, it is also straightforward to integrate SAP Customer Checkout with ERP systems such as the SAP ERP application, and the SAP Business One® and SAP Business ByDesign® solutions. This means you can manage POS systems centrally, connecting multiple outlets, and aggregating and analyzing data to see revenue and stock counts in real time to improve visibility across all your operations. Furthermore, you can also extend POS functionality to meet changing business needs by adding supplementary plug-ins.

Support multiple retail scenarios using a single solution

Fulfill the needs of your growing business

Stay productive with rich POS functionality

Gain in-depth insights for effective store and venue management

Scale, integrate, and extend your POS capabilities.

Stay productive with rich POS functionality

SAP Customer Checkout offers a wide range of advanced, intuitive functionality to help ensure your employees can work productively and provide your customers with a smooth purchasing experience. As well as standard checkout features such as processing payment by cash or cards, managing returns, and day-end closing, the solution enables you to apply discounts and manage vouchers.

Table service functionality helps staff in bars, cafés, and restaurants track orders effectively, supporting swift, efficient service. Meanwhile, loyalty management capabilities enable customers to collect and redeem loyalty points during the sales process.

SAP Customer Checkout is available in 13 languages. Furthermore, you can use the solution both online or offline, enabling employees to process and record sales even when your Internet connection is interrupted.

Fulfill the needs of your growing business

Stay productive with rich POS functionality

Gain in-depth insights for effective store and venue management

Businesses around the world use SAP Customer Checkout to streamline their POS operations.

Gain in-depth insights for effective store and venue management

Providing an overview of all your POS operations, SAP Customer Checkout manager helps you quickly access the information you need to run your store or venue effectively. Using the tool, retail and food and beverage managers can generate detailed sales reports across the setting and get real-time updates on revenue and stock status.

You can monitor time spent on the tills using time-recording functionality that stores information about when employees start and finish their shifts. You can also run in-depth reports to help you monitor

productivity KPIs such as daily takings for each employee. In addition, you can define how much information different cashiers can access through the POS solution, according to their level of seniority.

Loyalty management features allow you to analyze your customer base and identify your most valuable customers, enabling you to reward their loyalty with special offers and discounts. In addition, robust data privacy settings help you comply with legislation such as the General Data Protection Regulation.

Fulfill the needs of your growing business

Stay productive with rich POS functionality

Gain in-depth insights for effective store and venue management

Help retail and food and beverage managers do their jobs better with greater visibility of POS data.

Run more productively and efficiently

Catering for multiple retail and entertainment settings in a single solution, SAP Customer Checkout provides you with the flexibility to meet changing POS requirements while keeping down IT costs. The application supports everything from small businesses to global enterprises so you don't need to change POS software as your organization grows, minimizing both costs and disruption to your business.

Rich and intuitive checkout functionality keeps staff productive and helps ensure a superior customer

experience. Meanwhile, the ability to get detailed reports quickly and easily on revenue, stock, and employee performance supports decision-making and the smooth running of your retail, entertainment, or food and beverage environment.

Finally, customer loyalty tools help you administer incentive schemes such as loyalty clubs effectively while complying fully with data protection legislation. As a result, you can engage more closely with your best customers, encouraging repeat business and brand advocacy.

Run more productively and efficiently

Summary

The SAP® Customer Checkout application provides rich point-of-sale (POS) functionality, helping you run your business effectively and provide outstanding customer service. Catering for multiple retail and entertainment settings, this scalable and flexible solution allows you to adapt quickly to meet new business requirements.

Objectives

- Support POS operations across increasingly complex retail, sports and entertainment, and food and beverage settings
- Analyze employee performance, revenue and stock status, and customer spend
- Reduce IT complexity with a single POS solution that can scale as the business grows and diversifies

Solution

- Advanced hardware-agnostic solution, offering rich functionality that can be easily extended
- Intuitive user interfaces optimized for retail, quick service, and table service
- Stand-alone operation, or linkage to other locations through straightforward integration with an ERP system
- Management tools that provide visibility into POS processes
- Offline mode for continuity of operations even without an Internet connection

Benefits

- More efficient and flexible POS operations
- Improved support for informed decision-making
- Reduced IT complexity and cost
