Acumatica
The Cloud ERP

Streamline Payroll and Engage Staff with Integrated Payroll Management

Leverage native payroll to enhance productivity and reduce expenses.

Intuitive, reliable payroll software helps you increase employee productivity and pay taxes accurately and on time. Acumatica Payroll eliminates the cost of maintaining an interface to an external payroll system. The unified solution ensures payroll, project payroll taxes and costs, and employee time flow seamlessly across financials, project accounting, costing, business intelligence, distribution, manufacturing, construction, and field service. Companies can access payroll, financial, and all operational data on one centralised solution. Leverage construction-ready payroll capabilities, which are immediately available in your projects. Manage labor and payroll costs and support certified payroll, unions, and prevailing wages.

Designed for businesses with payroll requirements that range from simple to complex, Acumatica Payroll delivers pay to employees via check or direct deposit while simplifying payroll setup, processing, and reporting. This solution reduces data entry and increases data overall accuracy by automatically pulling time entry data entered into Acumatica Employee Portal into the payroll system. Companies can also upload employee earning details or earned hours from an Excel file directly to a payroll batch without using timecards. Employees can access paystubs on their mobile devices.

The payroll solution automates a comprehensive range of payroll activities. For example, you can run negative balances and set accrual start dates and carryover policies. Base accrual on hours worked or annual percentage.

Acumatica supports U.S. and Canadian payroll regulations, enabling you to process payroll in the U.S. or Canada.

Acumatica Cloud ERP provides the best business management solution for digitally resilient companies.

Built for mobile and telework scenarios and easily integrated with the collaboration tools of your choice, Acumatica delivers flexibility, efficiency, and continuity of operations to growing small and midmarket organisations.

Digital business management solutions

Pay Groups
Set up multiple pay groups to process paycheques with different pay periods and employee types. Set default deductions and benefits for specific groups and periods. Deploy User Roles in Pay Group to achieve segmented views and increase security.

Employee Classes
Set defaults to apply at employee setup, such as hours worked per week and year, location, WC Code, and PTO accrual. Set effective dates to manage multiple PTO banks.

Tax Rates
Receive tax rates at no additional cost, ensuring tax tables support federal, state, and local taxes.

Payroll Attributes
Track specific items for your state or location, such as information for ACA or W-2s. These attributes provide significant flexibility for state and locality tracking. You can also add company-specific attributes.

Earning Type Codes
Earning type codes are easy to define. Unlike with other systems, you don't need hundreds of pay codes—you can use a few easy-to-remember earnings codes.

Overtime Rules
Quickly configure overtime rules. Set daily or weekly rules and use state, project, or union parameters. Include multiple earning codes and piecework. Figure OT bonuses after-the-fact to comply with FLSA.

Deductions and Benefits
Track employee deductions and the portion paid by the organisation. If the deduction and the benefit are related to each other, you can enter the information once for the deduction and the benefit. Automatically prepare bills for vendors who provide benefits at the end of each pay run.

Reporting and Dashboards
Leverage out-of-the-box reports. Review payroll data via inquiry screens. Get anytime, anywhere access. Use operational and personal dashboards to view payroll data and costs. Let employees self-serve PTO.

Void Released Paycheques
Correct mistakes made in a payroll run with minimal rework and a few clicks. Paycheques can be voided even after being closed or partially paid to staff.

Settlement Pay Processing
Automate management and processing of final (settlement) paycheques for exiting employees, including relevant PTO pay, and deactivates the employee's account afterward.

Insurable Wage Limit
Automatically stop calculating Workers Compensation benefits when the wage limit is reached.

Canadian Payroll Support
Canada-based companies can manage a variety of payroll-related functions, such as tax calculations, EFT support, final paycheques and record of employment, certified project calculations, and Canadian tax reporting for all provinces. The solution maintains employment records per government regulations and automates bank transactions and EFT transfers per Canadian standards.

Mobile Support
Enable employees to review paycheques, and access and print paystubs from their mobile devices.
