

## Multi-Entity & Intercompany Accounting

Share customers and vendors across business entities and automate financial transactions between companies for buy-sell transactions.

Automate AR/AP processes between companies

Generate sales orders in one company from a purchase order created by another company

Automate purchase receipts when shipments are processed in the selling company

### Key business benefits

- Centralise cash management, vendor payments, and customer invoicing.
- Let related companies share vendor and customer records.
- Control company and transaction access using roles and groups.
- Create due-from and due-to entries automatically for intercompany transactions.
- Eliminate intercompany transactions on companywide reports if you choose.

*“Now we can charge items across branches and automatically track how much one entity owes the other. Before, we had to do multiple entries or cut multiple cheques.”*

–Matt Stoner, CFO, Dakota Red Corporation

CUSTOMER STORIES

## Automate Financial Reporting, Payments, and Intercompany Goods Transfers across Related Companies

Track financials and create reports for an unlimited number of related companies within your organisation. Related companies with the same charts of accounts, financial periods, and currencies benefit from real-time consolidation reports. Intercompany transactions are automatically calculated between related companies for both financial and inventory-related transactions. This allows you to seamlessly manage centralised bill payment, shared customers, intercompany journal transactions, intercompany goods transfers, and more.

### KEY FEATURES OF INTER-COMPANY ACCOUNTING

- **Company-based reporting.** Maintain individual ledgers for each company. You can eliminate intercompany transactions automatically when reporting across multiple companies.
- **Centralised payments.** Let companies purchase goods and services that are approved and paid for by other companies. Generate profitability reports that reflect the purchase at the company level.
- **Centralised invoicing.** Initiate sales orders from one company that are invoiced and collected by a centralised accounting team from a different company.
- **Inventory assignment.** Assign warehouses and inventory to specific companies. Inventory transfers initiate intercompany transfers to preserve company-level reporting.

Acumatica Cloud ERP provides the best business management solution for digitally resilient companies.

Built for mobile and telework scenarios and easily integrated with the collaboration tools of your choice, Acumatica delivers flexibility, efficiency, and continuity of operations to growing small and midmarket organisations.

## Digital business management solutions

### Account-Based Controls

Reduce potential errors by allowing intercompany transactions only for specific accounts.

### Centralised Purchasing and Invoicing

Centralise purchasing and invoicing through integrated AP, AR, and Sales Order Management. Purchase items and create sales orders in other companies with appropriate approvals.

### Company Bank Accounts

Link bank accounts to specific companies for their exclusive use. Assign cash accounts to specific companies in the Cash Management module.

### Asset Transfers

Assign and track fixed assets to specific companies in the Fixed Asset Management module. Transfer assets and bring depreciation and purchase history to the receiving company.

### Account Allocations

Allocate accounting transactions among companies for shared activities. Perform allocations automatically according to pre-set definitions.

### Role-Based Access

Create roles and groups of users that have access to specific companies and the associated transactions. Add users in seconds and maintain an audit trail of user activities.

### Close Financial Periods by Company

Manage financial periods separately for each company. Activate and deactivate financial periods for posting for a particular company, and close books separately in each company within the tenant.

### Company and Branch Selection

Navigate between companies and branches that represent separate legal entities, as well as companies with branches that exist within the same legal entity.

### Cross Company Sales

Support cross company sales. When companies within a tenant buy and sell services from one another, once an AR invoice is created in one company, the system can automatically create an AP bill in the corresponding Acumatica entity and link the documents together.

### Different Financial Calendars

Manage various financial calendars. Companies that have multiple legal entities within the same tenant can have different fiscal year-end dates. Accelerate implementation, simplify maintenance for companies that share vendors and employees, and facilitate the preparation of consolidated financial statements.
